

ATL

RACING SYNTHETIC GEAR FLUID

ATL Racing Synthetic Gear Fluid 75-85 weight

Superior Gear Fluid (Racing Formula) is a Super Premium Quality Synthetic Gear Fluid. It is made for racing differentials and transmissions from special synthetic base stocks, which give it outstanding resistance to high temperatures, and has friction modifying performance features not found in other gear fluids

Our Gear Fluids are formulated with unique propriety additives to provide maximum performance under all types of racing conditions. ATL's Racing Synthetic Gear Fluid exceeds API GL-5 MT-1 standards. It provides much better wear protection and load carrying capabilities than conventional gear fluids. Lower internal friction results in lower wear and operating temperatures and longer trouble free operation.

BENEFITS

- **Has tremendous shock load and E.P. properties**
- **Dramatically reduces operating temperatures**
- **Excellent rust protection & deposit control - keeps gears clean**
- **Outstanding oxidation resistance – long life at high racing temperatures**
- **Powerful antioxidants, anti foam agents & corrosion inhibitors protect against contaminants**
- **Very Low Volatility – stays in grade, resists thinning and thickening**
- **Very High Viscosity Index – extra wear protection at high temperatures**
- **Special additives reduce friction & wear and lower fuel consumption**
- **Outstanding water separation – helps to reduce wear and maintain film strength**
- **Compatible with most manual transmissions and rear ends, including quick changes**

ATL's Racing Synthetic Gear Fluid is used and recommended by racing teams participating in:

Nextel Cup/Nationwide • Hooters Pro Cup • ARCA/REMAX • Camping World Truck Series
WoO Dirt Late Model Series • IHRA • NHRA
